#### PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

#### SUMMARY

25X1D  
25X1D  
A small military installation, possibly a storage depot, is located on the south bank of the Dnestr River (Figure 1), one kilometer (km) east of Staryy Sambor (49-26N 023-00E). There were no apparent changes in the installation during the period of coverage. [REDACTED]

A barracks area and a stor-

age area with warehouse-type buildings comprise the installation (Figures 2 and 3). The road net in the area appears to be inadequate for heavy traffic. Logistic support probably depends on the railroad in Staryy Sambor, which is accessible by a hard-surfaced road.

#### DESCRIPTION OF INSTALLATION

##### Railroad Service

The nearest railroad passes through the town of Staryy Sambor, one km to the west.

##### Road Service

The internal road net of the installation appears to consist of hard-surfaced, well laid-out roads in good condition. A road of comparable quality leads to the railroad in Staryy Sambor. Outside the installation the roads appear to be no more than adequate to support the local, rather limited economy; therefore the installation must depend on the railroad for logistical support.

##### Administrative and Troop Housing Areas

Area D1 contains five 50- by 25-foot single-story administrative buildings and three 100- by 35-foot multistory barracks.

Area D2 contains three U-shaped multistory administrative buildings/barracks measuring 175 by 65 feet with 30- by 45-foot wings.

##### General Storage Area

Area E contains eleven 150- by 50-foot single-story, flat-roofed warehouse-type buildings, one 225- by 50-foot single-story warehouse, and four 50- by 25-foot single-story flat-roofed general storage buildings.
